https://syedbadiuzzaman.github.io

## Objective

Detail-oriented Computer Science graduate with strong skills in SQL, Excel, Python, and AI/ML engineering. Experienced in building machine learning models, NLP systems, and AI-powered applications. Seeking a role to apply analytical thinking, deep learning expertise, and data visualization abilities to drive business decisions and develop intelligent solutions.

## Skills

### Programming & Data
Python (Pandas, NumPy,Matplotlib,Seaborn )
SQL (MySQL, PostgreSQL)
Excel (VLOOKUP, Pivot Tables, DAX)

### Cloud & BI
AWS
Microsoft Power BI

### AI / Machine Learning
TensorFlow / PyTorch
Scikit-learn / XGBoost / LightGBM
NLP (NLTK, spaCy, Hugging Face Transformer
LangChain / OpenAI API / Anthropic API

### Deep Learning & MLOps
CNN, RNN, LSTM, Transformers
MLflow / Docker / FastAPI
Prompt Engineering / RAG / Fine-tuning

## Projects

### EQAP (Stock Market Prediction Web Application) *2025*
*Tools: Python, LSTM (Keras/TensorFlow), yFinance, Flask, Plotly, HTML/CSS/JS*

- Built an end-to-end web application that predicts stock closing prices using a deep learning LSTM model trained on 5 years of historical data.
- Fetched real-time and historical stock data via the yFinance API and engineered features including RSI, MACD, Bollinger Bands, and moving averages.
- Achieved a Mean Absolute Percentage Error (MAPE) of under 4% on test data across 10 major stocks (AAPL, GOOGL, MSFT, etc.).
- Developed an interactive Flask web app with Plotly charts allowing users to search any ticker, select date ranges, and view prediction vs. actual overlays.
- Deployed the app on Heroku with automated model retraining scheduled weekly via a cron job pipeline.

### AI Customer Support Chatbot with API Integration *2025*
*Tools: Python, LangChain, OpenAI API, FastAPI, React*

- Developed a full-stack AI chatbot using LangChain and OpenAI GPT API capable of handling multi-turn conversations with contextual memory.
- Built a REST API backend with FastAPI to expose chatbot endpoints, enabling integration with any front-end or third-party service.
- Implemented Retrieval-Augmented Generation (RAG) to ground responses in a custom knowledge base, reducing hallucinations significantly.
- Designed a React-based chat interface with real-time streaming responses and conversation history management.
- Deployed the application on Azure with Docker containerization, achieving sub-200ms average response latency.

## Education

**BACHELOR OF SCIENCE IN COMPUTER SCIENCE [Quaid-e-Azam University]** — *[Islamabad]*
**Graduation:** September- 2026
**Major:** Computer Science
